

5c

5C) Now add the remaining outer window trim. Remove the backing from each piece and place them just below the windows as shown. Follow by installing the remaining corner trim.

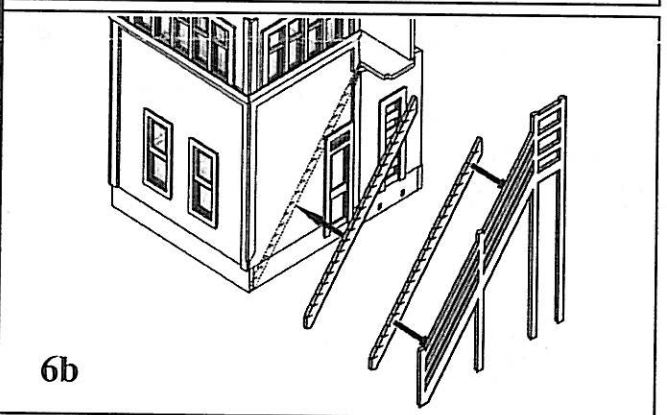

**Stairway and upper entrance:**

6a

6A) Glue the two entry way doors together as shown making sure to keep them square while they dry. Now glue these walls onto the flooring, then into the slot on the back wall of the tower.

6B) Now glue the stair stringers into place. The inner stringer gets glued to the side wall of the tower where indicated. The outer stringer is glued to the inside of the handrail

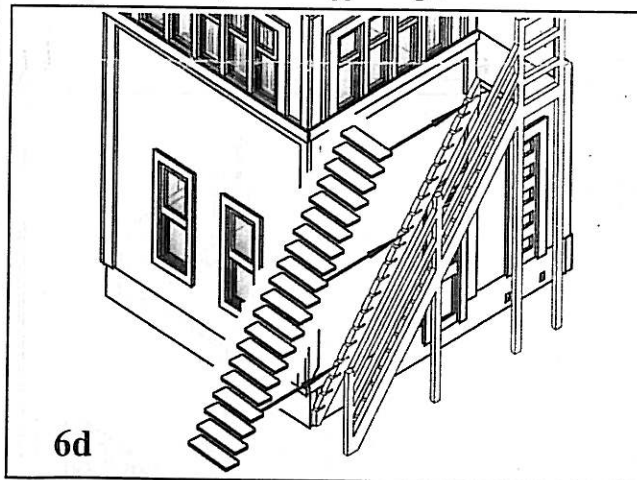

6b

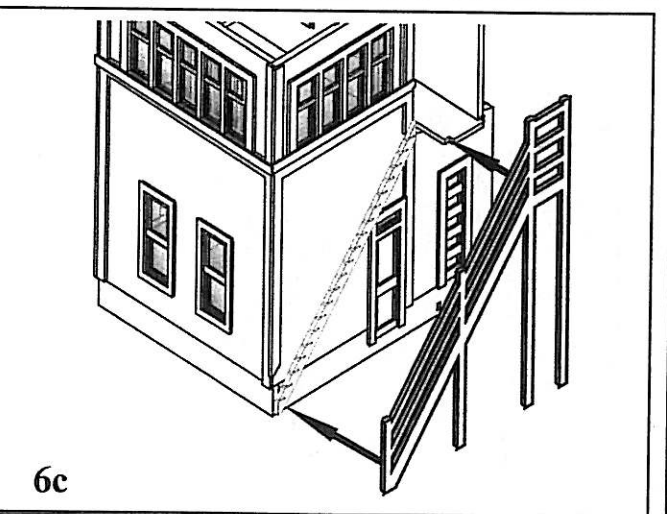

6C) Glue the railing and stringer assembly onto the tab on the edge of the porch flooring. into place The railing piece can then be glued to the platforms flooring. Make sure it is square and set it aside to dry.

6D) Install the stair treads starting at the bottom and working your way. Tweezers will come in handy here to hold them into place.

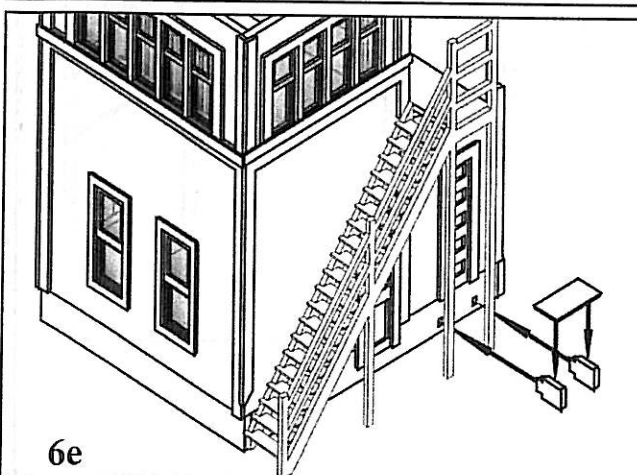

6E) To complete the stairway area glue in the two supports for the side step into the slots in the side wall as shown. Once dry, remove the backing from the step and place it on top of the support legs.
