

LASER-ART STRUCTURES by BRANCHLINE TRAINS

10) A resin chimney and two stovepipe chimneys (styrene tubes) have been supplied in your kit. These can be placed in the locations of your choice. Paint the chimney with your choice of brick red then glue the chimney into place using ACC or contact cement. Drill a 1/8" and a 3/16" hole in the roof for the styrene tubes, paint them a dark grey or silver color then insert them into the holes and secure with ACC.

Your kit is now completed and ready for your layout. We hope you've enjoyed this kit. If you have any problems or comments, please contact us at:
