

Parts Diagrams

9b

9b) Now glue the completed silo assembly to the main structure. Note that there is a slot on the bottom of the wall to glue the silo base tab into.

Roofing:

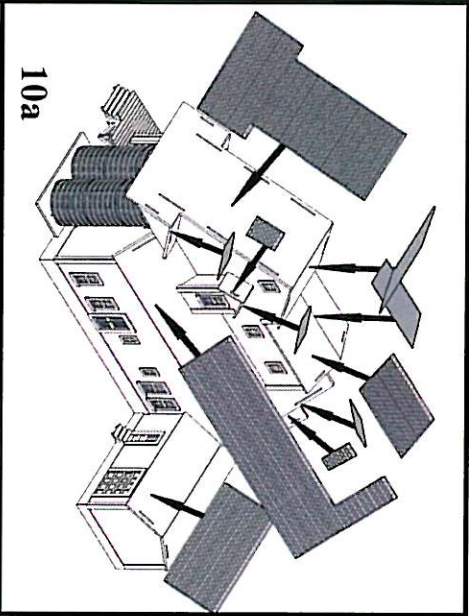

10a) We have provided peel-and-stick plastic roofing panels. Install these by removing the backing and carefully pressing each in place as shown.

10b) Plastic strips are included for use as roof caps. Cut to size and glue into place with plastic cement on the roof peaks and joining edges of the roof panels. See diagram.

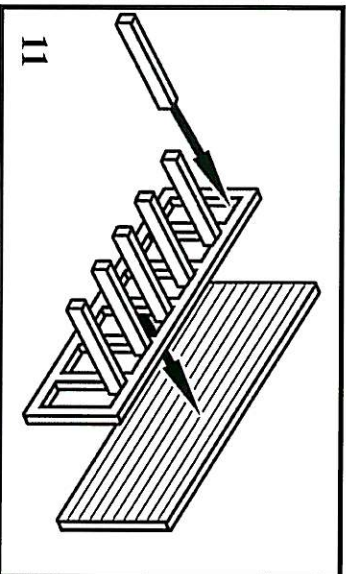

Sign:

11) To construct the sign apply the peel-and-stick frame to the back (scribed side) of the sign as shown. Now add the horizontal supports to the back of the sign and glue the assembly onto the roof. The paper sign can now be cut and glued to the front of the sign.

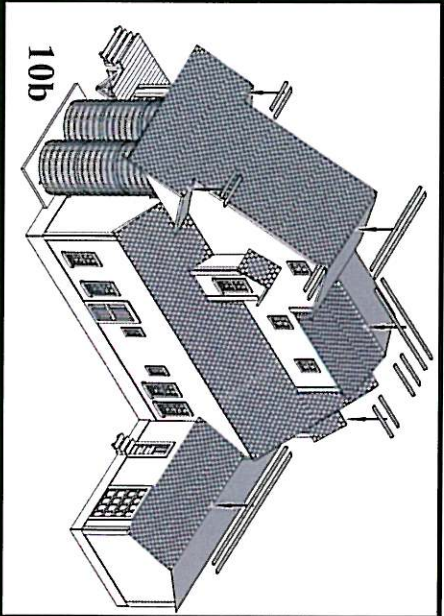

Your kit is now complete and ready for your layout.
