

LASER-AIR™ STRUCTURES by BRANCHLINE TRAINS

Sub Roof:

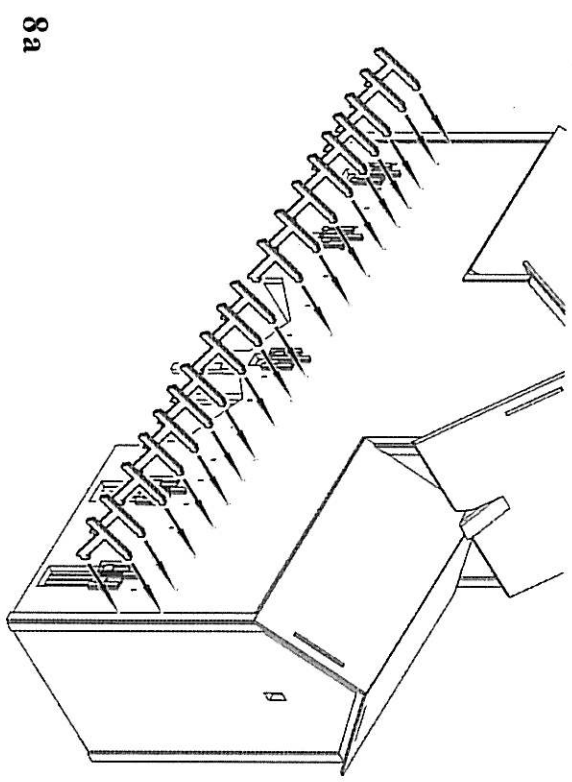

7) Glue the sub roof panels onto the tabs on the top edges of the walls. The two lower panels also mount into the slots in the center walls as shown.

If you have not already painted the main walls do so now before adding any additional parts.

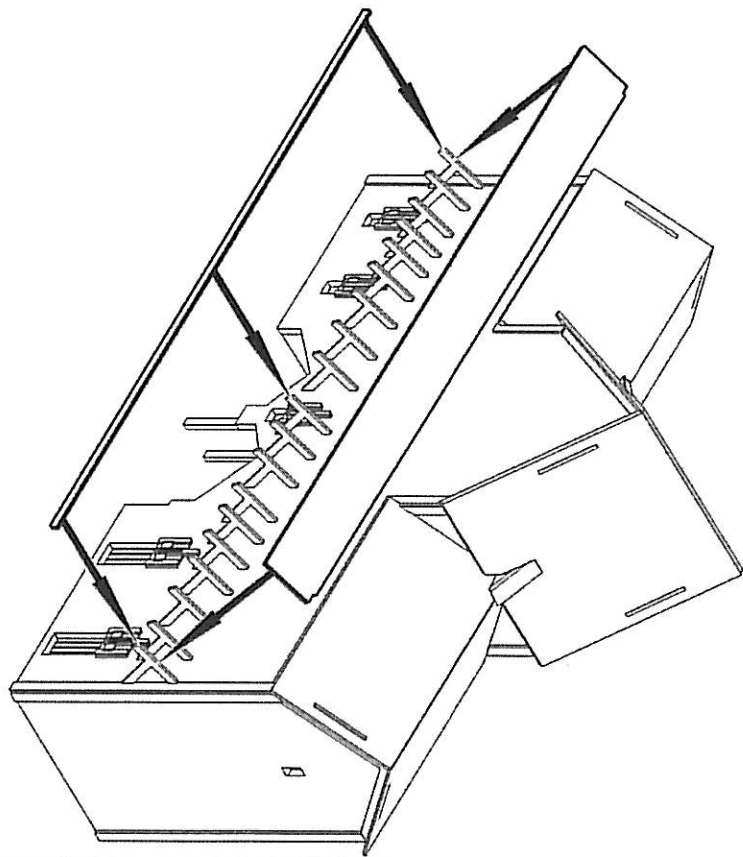

Chute Overhang Roofing:

8A) Glue the roof brackets into the slots in the front wall as shown.

8B) Now glue the sub roofing panel to the top of the supports. Next, add the front trim board.
